

Using this Documentation

This document describes the features of the Software AG documentation that make it easy for you to **navigate** to the page you need, to **search** for keywords, and to **print out** relevant parts.

Navigating through the Documentation

Navigation Bar

In the top right-hand corner of each page you will find a navigation bar that helps you to navigate through the documentation. The navigation bar contains some or all of the following links:

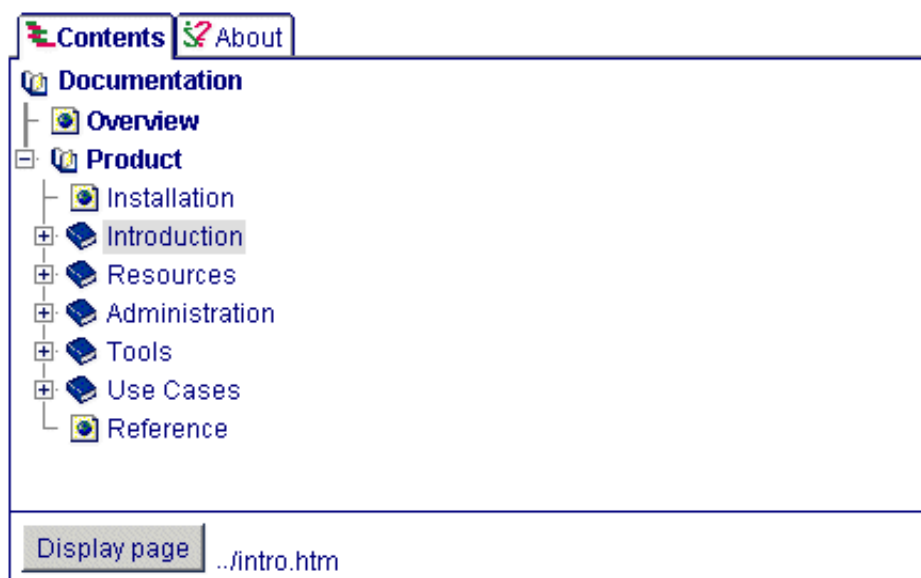

Clicking the **PREV** link on the first page of a documentation module takes you up one level in the documentation hierarchy.

Clicking the **NEXT** link on the last page of a documentation module takes you back to the first page of the same module.

Navigator Facility

The navigator facility is a Java applet that displays a collapsible/expandable, hierarchical tree view of the documentation, which helps you find your way through the documentation web. You can select in the tree view the document that interests you, then either double-click on the document title or click on the 'Display page' button.

Searching this Documentation

Use the link SEARCH from the navigation bar to open the Full Text Search page.

The Full Text Search software is supplied by PHD Computer Consultants Ltd.

You can get detailed help for using the Spy-CD Full Text Search by clicking on the Help button on the Full Text Search page.

Printing this Documentation

This user documentation is also available in Adobe PDF (Portable Document Format) for convenient, high-quality printing. The Adobe Acrobat Reader (or the full version of Adobe Acrobat) must be installed on your computer if

you wish to use the PDF files. If it is not already installed, you can download it by clicking here:

Click on the link PDF PAGE in the navigation bar at the top of a page to open the corresponding PDF file in the Adobe Acrobat Reader.

If you click on the link PDF BOOK in the navigation bar at the top of a page, a list of available PDF books will be displayed. A PDF book contains the entire contents of the current documentation module, including a title page and a table of contents -- just like a regular book. Click on the required link to start the Adobe Acrobat Reader and open the corresponding PDF book. You can print either the entire book or just selected pages as required.
